EXPERIENCE

Samsung Securities, Seoul, Korea Jan 2023 – Present
AI Engineer, seconded to **Samsung Finance AI Center** (Samsung Life), serving 4 affiliates Jan 2025 – Present

AI Agent Platform, PoC & Skill Hub (2026)

- Tested M365 Copilot (Jun–Sep 2026), enabled SharePoint skill reuse and wrote Work IQ guides. Led Securities interviews and joined Microsoft Q&A; findings reached 4 affiliates via a colleague-led council.
- Tested FabriX 1.7 against GenOS to identify usable features and improvement needs on the internal business network.
- Proposed a skill hub to address public-skill quality and security risks; built selection criteria, validation and improvement pipelines, MCP server, web UI and CI. Recommender implemented by a collaborator.
- Curated 44 of ~700 skills; 27 of 49 passed automated validation. Delivered the hub to the AI Innovation Team.
- Sole owner of a two-week Databricks–Foundry PoC (Mar 2026): built 2 RAG agents, an insurance golden dataset and evaluation code. Reviewed 3 architectures; authentication blocked the A2A connection.
- Evaluated retrieval, answer quality and latency; analyzed cross-cloud costs, data synchronization, authentication and audit risks. Delivered the final report on March 30.
- Taught AI to every new-hire cohort since 2024 H2 (4 cohorts) and to admin support staff (Dec 2025)

LLM Training & Evaluation Data (2025)

- Sole owner of data sourcing and acceptance for 530 finance books: research-based volume planning, selection against 4 affiliates' business coverage, cleansing criteria, vendor coordination and final delivery review.
- Standardized table, caption, formula and text handling to preserve context across deliveries; resolved new exceptions through vendor revisions and reinspection.
- Designed 13-domain financial evaluations and coded them with AI assistance. Corrected question errors and compared pre/post-training and external models; a separate team handled training.

Data Engineer Jan 2023 – Dec 2024

- Operated DW-to-Hadoop pipelines, tuned Hive/Impala partitioning, and managed CDSW, NiFi and Kafka
- Executed production validation for a real-time top-traded stocks ranking service
- Operated an internal RAG-based LLM QA service (300+ daily transactions, 130+ users)
- Co-led onboarding for 37 new hires (Jan–Feb 2024)

Data Engineering Intern, **Samsung Securities**, Seoul, Korea Jul 2022 – Dec 2022

- Automated DB anomaly reporting; built a financial word dictionary raising stemmer accuracy 10% → 42%

PROJECTS

orbit, TechCamp Korea 2026 (hosted by the U.S. Embassy Seoul) May 2026 – Jun 2026

- Private alumni network that turns post-event ties into a searchable directory kept current via LinkedIn (React, FastAPI, PostgreSQL, Docker)
- My role: built LinkedIn profile sync and activity-feed scraping, admin CSV allowlist upload/export, avatar upload and the production Docker deployment

Ask-Insurance, 2026 Financial AI Challenge (hosted by the Financial Security Institute) Aug – Sep 2026

- AI service explaining likely claim-denial issues to patients via agentic RAG over FSS dispute cases, policy terms and KCD codes (4-person team)
- My role: planning lead — owned the proposal from draft to fact-checked submission; built the input PII guardrail (KoELECTRA NER, 89% name recall) and a MyData consultation flow

EDUCATION

Sogang University, Seoul, Korea Mar 2017 – Aug 2022

B.E. in Data Science; B.A. in Economics (Financial Economics) · Graduated Cum Laude

Exchange Student, **University of San Francisco**, San Francisco, CA Jan 2020 – May 2020

EXTRACURRICULAR

President, **BOAZ (Bigdata Union Club)** Jan 2021 – Jan 2022

- Led weekly data engineering sessions for 51 members (ML to Kafka & Spark); reviewed 11 NLP papers

SKILLS

Technical: Python (Advanced), MySQL (Advanced), Linux (Intermediate), Docker (Intermediate)

Language: Korean (Native), English (Intermediate)
